

## Further development through Young Talents

Every company needs young, up-and-coming employees with modern skills and abilities to stay ahead of the competition. Perfect work performance and innovative ideas contribute to this.

Would you like to become part of our team and put your ideas into practice? We can encourage and support you, which is why we want to get to know you as early as possible and offer you the following entry-level opportunities with us:

### Internships

Do you want to complete a mandatory internship during your studies or gain experience on a voluntary basis? We offer a wide range of internships in various fields, most of which last three to six months.

### Bachelor / Master / Diploma Theses

You have almost finished your studies? The topic of your thesis has been decided? Now you need a suitable company to work on this topic? You can convince us with good ideas!

Send us your thesis topic on a maximum of one DIN A4 page with concrete ideas on how to proceed and send this proposal to us with your complete application documents.

Please remember to send us your documents in good time (at least 4 months before the planned start). This way we can check if we are the right partner and have enough time to prepare your start with you.

### We offer you

We offer you a trusting and professional cooperation, flexible working time, mobile working and actively support you in further training. Good performance should be rewarded, which is why we pay performance-related bonuses.

If you have any questions, please call us or write to us. We look forward to receiving your application, also by e-mail:
