

- Full - automatic cleaning & greasing of RPV stud and nut
- Hydraulic Unit
- Hydraulic high pressure will be generated by a compressed-air driven pressure intensifier pump
- Unit shown generate up to:
 - 1.650 bar
 - 23.931 psi
 - 165.000 kPa
- higher pressure per requirement possible
- Operator will be guided by a Panel PC
- Incl. elongation & pressure recording for quality documentation
- Designed for customized tensioning devices (steam generators, main cooling pumps, pressurizer etc.)
